| All Specifications are Averages and Subject to Change | |

DETAILS

The SAGE SHU 46oz Chemical Aerosol Projector is the largest personal carry projector available for the dispersion of medium to large crowds and prison operations. This unit can be operated with one hand when used with a tactical sling.

This unit is fitted with a spring loaded depression valve, hand guard for protecting the squeeze actuator and a Schrader valve for easily recharging the unit. A steel pull ring type safety pin passes through both the discharge mechanism and the actuator to prevent accidental discharge.

Our formulation of Oleoresin Capsicum (OC) combined with a non-flammable carrier makes it safe to use our aerosol sprays with Electro Muscular Disruption devices.

Labels are waterproof and carry Serial Numbers, Expiration Dates, Stock Numbers, Delivery System and additional necessary information for easy identification.

Custom blends are available upon request to meet your department requirements.
