"Super Soft Tip"

Kinetic Energy Baton

Ammunition

- Designed to be used to incapacitate non-compliant aggressive persons
- Special soft expanding impact surface material spreads energy over larger area, minimizing trauma
- Designed to be used in rifled barreled 40mm launchers such as M203, GL-1 and M79.
- Propulsion system is Sage's "Reloadable and Reusable Hi-Lo System"
- Projectile is designed to be spin stabilized
- Highly accurate out to 60 meters with high hit probability at longer distances.
- Three energy levels available
 - Standard
 - Mid-Range
 - Less Energy
- Ammunition is reloadable multiple times for "Cost Effective" training
- Extensive test and real life use data available for review
