

Sage International, Ltd.

Model GL 82 Muzzle-Down Gun Rack Assembly Fits Most Cars Minimizes Intrusion Into Passenger Space

As the down sizing of police cars continues, Sage International, Ltd.'s Model GL 82 Muzzle Down Vehicle Gun Rack Assembly continues to be a popular choice. The GL 82 is unique in that it can be adjusted and mounted in any vehicle to accept virtually all of the popular law enforcement long guns in use today.

Continuing concern over space allocation for a second officer in a car is put to rest by the GL 82's unique construction and adjustment principle.

The GL 82 is designed to reduce the visual presence of rifle or shotgun in a police car. Although discreetly placed, the weapon is readily at hand when needed.

Sage International Ltd.'s Muzzle Down Gun Rack Assembly has many features, which distinguish it as superior to competitive products now on the market.

GL 82/2R shown above

- Tripod construction allows mounting on the transmission tunnel to minimize intrusion into valuable passenger-side floor space.
- Easily adjustable for shotgun or rifle barrel lengths from 14" to 24".
- Legs adjust for length, 360 degrees of rotation and radial movement.
- Three floor-mounting pads, which, when combined with adjustments for leg length, rotation and radial movement give virtually unlimited, mounting possibilities.
- Adjustable trigger guard shroud aids in preventing accidental discharge and accommodates nearly all Remington, Mossberg and Ithaca shotguns and AR15/M16 rifles.
- Accepts standard or extended magazine shotguns and AR15/M16 rifles with magazines in the rifle.
- Sage's "Flex Barrel Pin" for shotguns and "Flex Flash Hider Cup" for rifles not only protects their respective muzzles they facilitate rapid removal and replacement of the weapon even when withdrawn or replaced at angles up to 35 degrees from the centerline of the rack assembly.
- Suitable for most folding or full stocked shotguns or AR15/M16 rifles.
- Air Bag compatible.
